Core Skills

Backend

Java (Quarkus), Node.js, REST APIs, Python

Frontend

Flutter, React, Next.js, TypeScript, Vue.js

DevOps & Infrastructure

Docker, GitHub Actions, Linux, VPS Deployment

Databases & Tools

PostgreSQL, MySQL, MongoDB, Prisma, VBA, Selenium

Availability

Remote, Part-Time, Contract:
Available for up to 40 hours per month

Timezone:
GMT+8 (aligned with Singapore)

Summary

Experienced Software Engineer seeking remote part-time roles, with strong expertise in full-stack development and DevOps. Proven track record of delivering robust systems and collaborating effectively in remote environments, supported by well-structured CI/CD pipelines. Comfortable owning features end-to-end, from architecture to deployment, in remote and

Professional Experience

- **Software Engineer (Full Stack / DevOps)** | Else Studio (Malaysia, Remote)
  Nov 2023 - Present
  - Delivers and maintains backend services using Java (Quarkus), REST APIs, and PostgreSQL.
  - Manages authentication and authorization flows with Keycloak integration.
  - Designed and maintained CI/CD pipelines that reduced deployment time and improved release stability.
  - Utilizes Docker, GitHub Actions, and VPS management for streamlined operations.
  - Integrates backend services with a Flutter-based frontend for web and mobile.
  - Collaborates effectively in a remote, asynchronous team using PR workflows and supporting structured QA processes.
- **Software Engineer** | AMC Group
  Sep 2021 - Oct 2023
  - Developed and shipped over 100 custom automation tools using VBA and C#.
  - Built and maintained a variety of small-to-medium internal tools for Microsoft Office.
  - Served as the primary automation engineer, resolving workflow and operational challenges.
  - educed manual processing workload by building 10+ automation tools used across the organization.

Selected Projects

- **SUC Echo | Anonymous Real-Time Communication Platform:**
  Engineered a full-stack anonymous communication platform with real-time messaging capabilities. Tech: Next.js (TypeScript), Supabase (PostgreSQL), Prisma, Vercel.
- **Inventory Planner | Business Operations Tool:**
  Built an Excel VBA add-in for a client to manage container planning, data auditing, and logging, improving inventory workflow efficiency.
- **Browser Automation Tools | Insurance Guarantee Processor:**
  Developed a Python desktop tool to automate data entry by extracting data from PDFs (regex) and populating web forms via Selenium.
- **NodeFlow | Qualitative Analysis Desktop App:**
  Created a Python/PySide6 tool for researchers to manage hierarchical node coding, track participants, and export data to JSON/Word/Excel.
- **SchemaVisualizer | Interactive Data Visualization Tool:**
  Built a developer tool with React and D3.js to transform JSON database schemas into interactive, navigable diagrams for easier analysis.

Education

- **Bachelor of Software Engineering:** Southern University College
- **Diploma in Information Technology:** Sunway College Johor Bahru
